

Teche

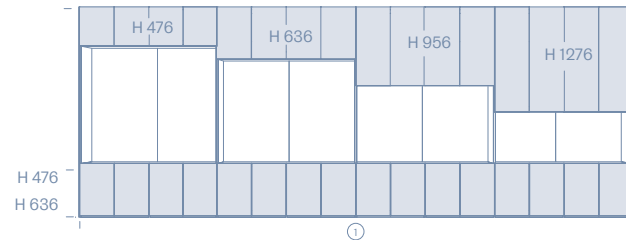

Gli elementi Teca sono moduli composti caratterizzati dalla presenza di un vano a giorno in associazione a parti chiuse rappresentate dalle basi Collage con ante o cassetto e dai moduli a ponte sospesi. I vani a giorno possono essere allestiti con ripiani di varie tipologie, tubi appendiabiti e delimitati da schienali disponibili in tutte le finiture. Le configurazioni e le misure che si generano sono molteplici quanto gli utilizzi che se ne possono fare. A seguire una esemplificazione di misure e conformazioni ottenibili.

Teca elements are composed modules characterised by an open compartment combined with closed sections represented by Collage base units with doors or drawers and suspended overhead modules. The open compartments can be fitted with various types of shelves and clothes hanging rails and are delimited by back panels available in all finishes. Below configurations and sizes.
