CAPACITY

ATTENTION : the capacity is related to the hardware mounted in the furniture. The given plugs for the wall mounting may not be suitable in certain situations. The responsibility concerning the assembly of the furniture belongs to the buyer, who must evaluate the resistance of his/her wall. The stability and capacity of wall-mounted elements are guaranteed by the proper assembly and by following our instructions correctly. The shelves inside the units are designed for the light loads typical of residential use (around 25 kg per square metre), distributed uniformly over the surface. For heavier or more concentrated loads, we recommend using single units with 300 - 375 - 450 - 600 mm width.
