## Perimetri Cabaret / Cabaret perimeter

\* pensile / wall unit

I contenitori Cabaret si distinguono per i perimetri dal ridotto spessore di 10 mm, che definiscono un'architettura essenziale e visivamente leggera. La struttura a perimetro aperto è completata da una schiena retro finita, mentre i fianchi laterali, sporgenti come il fondo, enfatizzano la precisione del disegno e la pulizia delle linee.

All'interno dei perimetri, progettati per coniugare leggerezza formale e rigore costruttivo, è possibile inserire i contenitori Lampo con frontali in legno o vetro di spessore 20 mm nelle tre tipologie Cabaret One, Cabaret Step e Cabaret Glass.

Cabaret storage units are distinguished by their slim 10 mm edges, which define an essential and visually light architecture.

The open perimeter structure is completed by a finished back, while the side panels mimic the bottom panel, emphasising precision and clean lines. The internal edges, designed to combine formal lightness and structural rigour, allow the possibility to insert Lampo storage units with 20 mm thick wooden or glass fronts of three types: Cabaret One, Cabaret Step and Cabaret Glass.
