Domino Boiserie

CARATTERISTICHE

I pannelli Boiserie, le mensole e contenitori Domino vengono appesi tramite UN RETRO PANNELLO IN MDF NERO SPESSORE 19 che viene fornito con tutte le predisposizioni e ferramenta per essere appeso alle barre tra i fianchi armadio o direttamente al muro, ed è già compreso nel prezzo delle boiserie. Può essere completato con una luce Led perimetrale annegata nello spessore a vista. I pannelli Boiserie e le mensole risultano distanziati 24 mm dal muro. Il retro pannello viene suddiviso di volta in volta in base alla dimensione della composizione per agevolare il suo trasporto e di norma i tagli sono sempre in corrispondenza di inizio o fine di un pannello Boiserie o di un contenitore. I contenitori Domino e le mensole in metallo vengono montati aderenti al retro pannello mentre le Boiserie e le mensole Domino rimangono distanziate di 5 mm formando un'intercapedine necessaria al cablaggio.

FEATURES

Domino Boiserie panels, shelves and storage units are hung using A BLACK MDF BACK PANEL THICKNESS 19 which comes with all the necessary fittings and hardware to be hung on the bars between the sides of the wardrobe or directly on the wall, and is already included in the price of the boiserie. It can be completed with a perimeter LED light sunk in the visible thickness. The Boiserie panels and shelves are spaced 24 mm from the wall. The rear panel is divided according to the size of the composition to facilitate transport, and cuts are normally made at the beginning or end of a Boiserie panel or storage unit. Domino storage units and metal shelves are mounted flush with the rear panel, while Boiserie panels and Domino shelves are spaced 5 mm apart to create a gap for wiring.

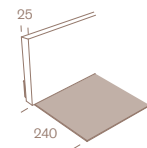

- ① Asole per fissaggio pannelli Boiserie e Libreria
- ② Attaccaglie per elementi pensili
- ③ Cassettiera Domino
- ④ Mensola metallo da appendere direttamente al retro pannello
- ⑤ Pannello Boiserie per TV
